GREENE-JOHNSON Sections 011 & 012

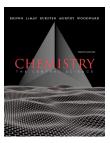

General Chemistry A (101)

Instructor: Willetta Greene-Johnson, Ph. D., Room 307 Cudahy Science Hall 773-508-3537 Who am I: A chemical physicist interested in surface optico-physical interactions and mildly interested in (1) thermodynamical (2) unstable systems; (3) producer, composer, orchestrator, pianist, sequencer, and conductor. My vocal ensemble also has recorded three compact discs—plans are in the making for a new project in 2012. One of my songs was doubly tracked on a Grammy award winning choral gospel CD in 2004.

Physical Office Hours: Wednesday 10:25 A - 11:25 A

Email Office Hours (ONLY): Thursday 10:00 A - 11:00 A wgreene@luc.edu

Required: Chemistry, the Central Science. 12th ed. Theodore L. Brown, *et. al.*. Boston: Pearson Prentice Hall: 2011 IBSN: 978-0-321-69672-4. (The *Mastering Chemistry* asset is NOT required in my section, but *may* be required in a future Chemistry 102 section.)

Chemistry 101 Course Packet, authored by the instructor. This essential lecture packet is available online at www.universityreaders.com. The course packet will be mailed to you within a few days of ordering, but you'll have immediate online access to the first 10 or so pages once order is completed.

Meetings: Lectures are scheduled MWF in Crown Center, at 12:35 P –1:25 P. You must also be registered in discussion section 011 or 012.

Discussions: meet on Thursdays according to the following schedule:

Section	Instructor	Location	Time
011	Dr. Greene-Johnson	CS-207	Th: 11:30 A – 12:20 P
012	Dr. Greene-Johnson	CS-202	Th: 2:30 P - 3:20 P

Due to the large number of students / focus sections that are matriculated through this course yearly, there can be <u>absolutely no alteration</u> of this schedule.

Course Description: A study of chemical principles and generalizations with emphasis on the development of a scientific attitude and an understanding of the fundamental concepts of chemistry.

Calculators: Any <u>scientific</u> calculator is probably sufficient, however calculators cannot be shared while exams are in progress and their cases/covers must be removed. Be sure that you are familiar with your calculator and that its batteries are in good condition, especially on the day of exams. The student is responsible for having his calculator on an exam day.

Blackboard Connection: The syllabus, homework assignments for the semester, discussions, and discussion answers will be posted at the following website: www.luc.edu, look under *Technology*, click on blackboard). Students possessing a Loyola email address are able to access this site.

Additional Information: For your convenience, test taking tips are listed on page 5 of this syllabus, as well as a protocol regarding soliciting a recommendation from me, should you desire one <u>and qualify</u> (see protocol). Additionally, the academic fall calendar and bookstore information is listed on page 7.

CHEMISTRY 101 Tentative Schedule of Topics

CHEIMISTRY TO Frentative Schedule of Topics					
Week or Day	Topic	Ch(s)	approx. pages		
8/29 - 9/2	Intro Matter, Measurements,	1	3 – 15		
	Significant Figures, Conversions	1	16 - 30		
0/5	Periodic Table Overview / Atomic Model LaBoR DaY –no classes				
9/5		0	40 C7: na CC = alkanaa		
9/7 - 9/9	Atomic/Formula Masses ; Mole	2	40 - 67; pg 66 = alkanes		
9/12 - 9/16	Stoichiometric Calculations	3	77 - 85;		
9/19 - 9/23	Limiting Reactant; Theor./Actual Yield	3	86 – 104;		
9/21	Review for Exam 1		Opt'l—Thus, see disclaimer below		
9/23 Friday	EXAM 1 - Remember your (uncovered!!!)	1 – 3	Concerning reviews, if student desires information, that student		
	calculator. Take your bags to the front. Leave	only	ONLY is responsible to ATTEND or		
	every 2nd row empty. No cell phones or PDA's	parts	otherwise obtain the information. Handouts MAY or MAY NOT be		
	(smart or otherwise) while taking exam.	that we covered	disseminated.		
9/26 - 9/30	Aqueous Rxns (1) Precipitation	4	119 – 124; read 116 - 119		
0.20	(2) Acid Base Reactions	T	125 – 129		
10/3 - 10/7	A/B Reactions; Redox Reactions	4	129 – 135		
10/10, 10/11	Mid- FALL break		Hurrah!		
10/12, 10/14	Redox Reactions; Stoichiometric Applications	4	139 - 148		
10/17-10/21	Ideal Gas; Calc'ns; Molar Mass Density /	10	383 – 399		
	Stoichiometry; Dalton's Law /Kinetic Theory / Effusion	10	399 – 414		
10/24	Thermochemical Eq'ns: calorimetry	5	175 – 180		
10/26	Review for Exam 2		Optional—see disclaimer above		
10/28 Friday	EXAM 2	4, 5, 10	Obviously 5 we "got to"		
10/31 – 11/4	Enthalpy	5	169 – 175; 183 – 188		
	Hess's Law;	5	181 – 183		
	Light & Matter; Hydrogen Bohr Model	6	207 – 212		
Nov. 4	Last day to withdraw w/o penalty	Č.	hopefully, not scary?		
11/7 - 11/11	Pauli's Exclusion Principle PEP; e conf'n /	6	213 – 218		
	Quantum #s; Hund's Bus Rule; Orbital	6	219 – 238		
	Diagrams Hund's, Paramagmetos, e ⁻ config'n	7	254 – 266 selected reading		
11/14 – 11/16	Periodic Table Trends: size, EN, IP, EA;	8	289 – 306; 309 – 321		
	Covalent Bonding/Lewis structures;	9	332 – 344; 346 – 356		
	Resonance; VSEPR model; σ , π bonds	8	Formal charge 307 – 309		
11/18	Review for Exam 3		Optional—see disclaimer above		
11/21 Monday	EXAM 3	5 - 9			
11/23 –11/27	THANKSGIVING BREAK		Enjoy!		
11/28	Hierarchy of Interstitial Forces	11	425 – 434		
11/30, 12/2	Liquid/Vapor Equilibrium / Phase	11	435 – 443		
	Diagram;	11	444 – 453;		
12/5 – 12/9	Molecular Orbital Theory	9	358 – 372		
12/14	REVIEW for FINAL		place and time TBA		
12/16	FINAL 9:00 A - 11:00 A	1 - 11	Location TBA, probably (maybe) Crown Center		

HOMEWORK¹: is not graded, but student is strongly encouraged to do it, and to do it it well. A similar assessment is made via weekly discussion assignments. Additionally, exam representative problems will be distributed in discussions. End-of-Chapter Problems: Students who are making good progress in the course should be able to solve, independently, most or all of the end-of-chapter problems in the textbook, as well as a number of the problems in discussions. A group of exemplary problems is listed below as "assigned" problems. There are on average 15-20 of these per chapter.

- Chapter 1, pg. 31: 1, 5, 9, 11, 13, 15, 19, 23, 25, 27(a), 31, 35, 37, 39, 43, 47, 51 (you need two conversions: g tp kg and L to ft²), 55, 59, 62, 71; ch 1:
- Chapter 2, pg. 69: 1 opt'l (physics is everywhere), 3, 6, 7, 5, 9, 11, 25, 29, 31, 35, 37, 39, 43, 45, 47 (O = red, C = black, H = white), 49, 55, 57, 59, 63, 67, 73, 87, 89, 99, 101; Ch 7: 112, p. 287
- Chapter 3, pg. 105: 1, 3, 9, 11, 13, 17, 19, 21, 23 a-c, 29, 33, 35, 43, 45, 51, 53(a), (pH: equil'm conc'n of H^{+} ions, $[H^{+}] = 10^{-pH}$), 67, 69, 71, 75, 69, 73
- Chapter 4, pg. 150: 1-3, 7, 11, 15, 19, 21, 25, 29, 35, 39, 47, 49, 51, 59, 61, 63, 69, 77, 96 (for the truly committed) 94
- Chapter 10, pg. 415: 6 (hint, count the contents in each valve), 9 a-b, 25 $\Delta P = \rho gh$, 33, 35, 39b, 41, 49, 53, 57, 59a, 61, 65, 75 (how many moles of each?), 85, 89, 115, 125
- Chapter 5, pg. 196: 3-5, 8, 11, 15 (Kinetic energy = $\frac{1}{2}$ mv² unit Joule (J)), 13, 17, 19, 23, 29, 33, 37, 41, 45, 47,51, 53, 57, 63-65, 73, 75, 85. 89, 93, 97, 102
- Chapter 6, pg. 240: 1-3, 6, 7 (optional), 15, 17, 25, 27, 35, 37, 43, 51, 53, 55, 69, 70-72, 80 hc/ λ is the energy per photon. Energy during CD play = (Power• Δ t), 97 **Brown's condensed** electron config'n is my valence e⁻ confg'n. $\Delta E = \frac{1.196 \cdot 10^5 \frac{kJ \cdot nm}{moL}}{\lambda \cdot (nm)}$; λ in nm
- Chapter 7, pg. 279: 25, 27, 30, 47-50, 61, 67 a (product = strong base) and c(product = strong acid), 73, 99 (think about it. Which element has the higher electron affinity?)
- Chapter 8, pg. 322: 1, 4, 9, 11, 13, 17, 19, 33, 35, 47, 51, 53, 63, 83, 101
- Chapter 9, pg. 374: 5, 19, 27 for a-f find instead the <u>orbital</u> and <u>molecular</u> geometries², 31, 33, 35a, 39, 43, 51 (my <u>parent</u> geometry is book's <u>e- domain</u> geometry), 63: only answer: how many σ & π bonds), 69, 89, Note that the *CUMBERSOME* terminology <u>electron domain</u> corresponds to my <u>electron pair</u>. And term <u>electron domain geom</u>. corresponds to my <u>orbital geometry</u>
- Chapter 11, pg. 453: 2 7, 8, 11, 21, 25b, 33, 39, 43, 45, 57, 59, 63, 83, use *Clausius Clapeyron Eq'n* and 2 data points to find ΔH_{vap} .

Examinations and Academic Honesty Three 50-minute exams and the final exam will be given on the dates below, also noted in the schedule.

Sept. 23, Oct. 28, Nov. 21

The 2-hour **final exam** will be administered on **Friday**, **Dec. 16** at 9:00 – 11:00 A at a location to be announced (most likely Crown). Your course grade will be determined from these exams by

¹ The solutions to homework problems will be placed on 2-hour reserve at the Cudahy Library.

orb geom (a) thru' (f): AX₂, AX₃E, AX₄E, .AX₆. AX₄. AX₂

a procedure elucidated in the next section. The exams and the final exam are cumulative; i. e., will probably include material which has been tested on the previous exams.

Academic Integrity

All students are responsible for exercising the highest level of academic honesty while taking exams. The University policy on plagiarism and cheating is stated at:

http://www.luc.edu/academics/catalog/undergrad/reg academicintegrity.shtml

in the online Catalogue of Undergraduate Studies. As in the past, cheating will be SEVERELY dealt with, *minimally* costing the offender an F in the course. Which <u>has</u> happened before.

Grading Scheme:

The scores of the three-hour exams, a final exam and selected problems on the discussion worksheets will be used to determine your course grade. If quizzes are administered, their points will count toward the discussion grade. If an exam/discussion is missed for any reason, other than extenuating circumstances deemed admissible by the higher powers (University policy), that exam will be dropped, and/or that discussion will receive a score of 0 points. If a second exam must be missed, then in order to make up that second exam, a doctor's note and/or a letter from a guardian, supervisor, etc., must verify proof of illness. This written request must be presented to the instructor no later than 3 calendar days after the exam date (the following Monday), or no make-up exam can be administered.

Course grade will be determined in one of two ways:

Item	Method 1	Method 2
Exam 1	20 %	20 %
Exam 2	20	20
Exam 3	20	One dropped: Ex. 1 or 2 or 3
Discussion Work-sheets/ Quizzes	10	10
Final Exam	30	50

Whichever scheme benefits the student at semester's end will be employed. Note, at least two mid-terms must have been taken prior to the final, or else the student will receive an **F** in the course.

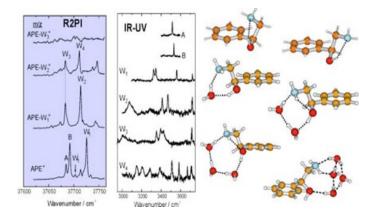

Please make every attempt to take the final exam on time. If the final exam is missed, the student will receive an automatic WF. If no action is taken, the WF will automatically revert to an F. The student must have valid documentation of why the exam was missed, and must contact the Dean's office of the college that she is registered in. It is the student's responsibility to coordinate the make-up exam between the dean's office and the instructor.

GRADING SCALE (for undergraduates, Loyola Chemistry Department.)

Grade Scale:		Α	≥ 90	A-	87-89
B+	84-86	В	80-83	B-	77-79
C+	74-76	С	70-73	C-	67-69
D+	64-66	D	60-63	D-	57-59
F	< 57				

Laboratory: Chemistry 111, the general chemistry laboratory course, should be taken concurrently with the lecture course in general chemistry. The lecture and the laboratory courses are graded independently. Students should first consult the Chemistry Dept. Bulletin opposite the wall facing the chemistry office for information or they can contact Dr. Angela Boerger, the administrator of the laboratories.

Room Instructions on Exam Days

- 1) Find a seat as quickly as you can. Do not try to sit with friends or near one's usual area. The exam is only 50 minutes, so excessive delays will cut into exam-taking times.
- 2) Place your student ID conspicuously on your desk so that attendance may be noted (during exam).
- 3) Have several pencils/pens, eraser, etc. and a calculator in good working order.
- 4) Proctors have been instructed to confiscate the exams of any student using a calculator with its slipcover in place.
- 5) Read over the entire exam. You may find a problem in the middle, or at the end, that suits you better to start. The three or so minutes spent glancing over the entire exam will be more than compensated for by the strategy and priorities that you formulate. The recommended order to do problems is:
 - (1) what you know well FIRST
 - (2) what you're sure you can at least start NEXT
 - (3) what you haven't have a clue for LAST

I have tried to arrange problems in a reasonable order, but my perception and the student's will certainly differ in some aspect. So, take a few minutes to read over the exam and devise a strategy.

- 6) When you have concluded, turn in your exam to proctor or instructor. Leave as quietly and as expeditiously as possible as to not disturb other exam takers.
- 7) Normally, exams administered on Friday will be returned the following Wednesday. *Please* don't harangue the Chemistry staff (and certainly not the physics staff for a chemistry course!) As a general rule, I do not appraise them of my grading schedule. There is normally no issue, however final examination will take the longest to grade (about 6 days) because it is hand-graded. I promise you that I will move as swiftly and as accurately as I can!

Advanced Studies Recommendation Protocol

Later in your student career, you may require recommendations for graduate school, medical school, or the like. If I am chosen among your recommenders, the following policy ensues:

- 1. Student must generally possess GPA of 3.4 or above. However, if my time allows, a student might be considered if she or he presents a **written explanation** that reveals an exceptional circumstance accounting for a lower grade point average.
- Student must provide a Microsoft Word-formatted document listing his/her official transcript GPA, contact information, deadline(s), and also all chemistry, biology and physics courses and labs that the student has take—in the following format (or Committee format, if you are applying through committee):
 - a. GPA
 - b. reliable, current email and telephone # that student checks regularly
 - c. **DEADLINE**
 - d. Table with header: course taken, instructor, grade

Example:

Course	Semester / year	Instructor	Grade
Chemistry 101	Fall /11	Dr. WGJ	B+
Biology 210	Spring /10	Dr. Barbara Haas	Α

- e. If applying "outside the Committee"—see items 4,5 below, a list of all schools of the applicant and **ALL of their DEADLINES**.
- f. All cover forms, application packages, envelopes in one binder, folder, or otherwise secure containment, with like items paper-clipped together.
- 3. If I can do a recommendation for you, I'd love to read your personal statements, even in rough draft form. It tells me something about you and helps me to shape a recommendation. This article is not required, but I recommend it.
- 4. It is STRONGLY recommended that the student applies through the Loyola Pre-Health Advisory Committee. The Committee is well regarded by the medical/dental/pharmaceutical community, and its voice of endorsement will be a plus in student's application process. Also, eventually the student's personal statement, etc. must be strong, and well written. If the student applies via Committee, s(he) should provide a cover sheet obtained from the Office of Pre-health on the 2nd floor of Damen Hall.
- 5. APPLICATIONS OUTSIDE COMMITTEE: If the student who I can recommend elects to apply outside of committee (apart from the Pre-Health Advisory committee), then she/he must perform steps 1-3 and email me at wgreene@luc.edu (and one other eaddress that will be provided). Student will receive a doc file via email. The student must open copy this file and type in each school or college address, creating as many documents as the number of schools to which he/she intends to apply. The student then must attach those documents and email all the attachments, along with doc items request in steps 1-3 in one email, to myself.

LOYOLA UNIVERSITY CHICAGO FALL CALENDAR 2011

	. • -, . •		
August 28 (midnight)	Sunday	Open registration ends	
August 29	Monday	Fall Semester 2011 begins	
August 29	Monday	Late and change registration begins Late registration fees apply	
September 6	Sunday	Late and change registration ends Last day to withdraw without a "W" grade	
September 2	Friday	Labor Day weekend begins Classes that begin at 4:15 p.m. or later do not meet	
September 4	Sunday	Last day to withdraw from class(es) with a Bursar credit of 100%	
September 5	Monday	Labor Day, Classes do not meet	
September 6	Tuesday	Classes resume after Labor Day	
September 12	Tuesday	Last day to convert from credit to audit or vice versa Last day to request or cancel pass/no pass option	
September 12	Sunday	Early alert process begins (Last day of the 3rd week of the semester)	
September 19	Sunday	Last day to withdraw from class(es) with a Bursar credit of 50%	
September 26	Sunday	Last day to withdraw from class(es) with a Bursar credit of 20% (zero credit thereafter)	
September 30	Friday	Last day to file applications for degrees awarded in May 2011 or August 2011 (Deans' offices)	
October 7	Friday	Last day for students to submit assignments to change an "I" grade to a letter grade from the preceding Spring and Summer Semester/Terms to a letter grade; Faculty may set earlier deadlines with students	
October 10-11	Mon. & Tues.	Mid-Semester Break: No classes	
October 12	Wednesday	Classes resume after Mid-Semester Break	
November 3	Thursday	Graduate, Non-GSB, Spring Registration Begins	
November 4	Friday	Last day to withdraw with a grade of "W" After this date, the penalty grade of "WF" will be assigned	
Nov. 23 -27	Wed- Sun.	Thanksgiving Break: No classes	
November 28	Monday	Classes resume after Thanksgiving Break	
December 14	Wednesday	Study Day: No classes	
December 16	Friday	9:00 AM - 11:00 AM CHEMISTRY 101 Final Examination	

Lake Shore Bookstore Phone: 773-508-7350 6435 N. Sheridan Road
