PROFESSIONAL SERVICE

International

- 2012 Visiting Scholar, Boromarajonani College of Nursing, Surat Thani, Thailand
As part of a day-long workshop on research methods for students and faculty, presented cancer symptom cluster program of research and big data analytics approach using latent variable mixture modeling.
- 2012 Visiting Scholar, University of Pretoria College of Nursing, South Africa
Conducted a five-day workshop on quantitative research methods for PhD students and consulted with faculty on big data analytics approach using latent variable mixture modeling.
- 2011 Visiting Scholar, Seoul National University College of Nursing, Seoul, Korea
As part of a day-long workshop on research methods for students and faculty, presented evolution of symptom clusters in adult survivors of childhood cancers as practice-driven program of research and potential application to group-based models of primary care.
- 2009-10 International peer reviewer, Italian Ministry of Health (in cooperation with the NIH Center for Scientific Review)
Reviewed research projects aimed at improving the quality and efficiency of healthcare delivery through innovations that are relevant to health services practice

Course Development

Team-based learning in an online research inquiry course – Developed team-based learning modules and implemented team-based learning in an online research inquiry course for master's students.

Team-based learning in PhD-level statistics courses – Developed team-based learning modules and implemented team-based learning in two advanced statistics courses.

Evidence-based practice workshop – Developed 2-week workshop for visiting undergraduate students from Kyung Hee University, Seoul, Korea.

Intermediate Statistics – Integrated self-paced open source course materials from Open Learning Initiative with multimodal synchronous and asynchronous technology-enhanced learning activities.

Health Services and Health Behavior Research: Methods and Measurement - PhD elective course to enhance conceptual understanding and application of advanced methods and measurement, including latent variable and mixed effects analytic models.
