

In the frame of Theo 313/424, the Cody Chair invites all graduate students of NTEC, BS, and BLL to an Advanced Graduate Seminar

SCRIBAL HARMONIZATION OF THE SYNOPTIC GOSPELS

Cambry Pardee, Loyola University Chicago

STATISTICAL METHODOLOGIES APPLIED TO THE STUDY OF THE SYNOPTICS

Jef Tripp, Loyola University Chicago

TUESDAY, SEPTEMBER 16, 2014

MUNDELEIN 203

4:15 – 6:45 P.M.

Refreshments will be provided.

**For more information, contact Prof. Edmondo
Lupieri at: elupier@luc.edu/773-508-2363**

Cambry Pardee is a PhD candidate in New Testament and Early Christianity here at Loyola. He graduated from Pepperdine University with a Bachelor of Arts in Religion and in Communication and went on to study at Yale Divinity School where he earned a Master of Divinity degree. His primary research interests include the Canonical and Apocryphal Gospels and he is currently researching scribal activities in the manuscripts of the Synoptic Gospels.

Jeffrey M. Tripp began by studying mathematics and taught the subject for several years before transitioning to biblical studies. Arguments from order, in which agreement in the sequencing of textual elements is measured and interpreted, bring the two fields together. Using traditional and newly developed techniques, Tripp examines the strength of quantitative arguments from order when applied to the Two-Source Hypothesis and highlights how these arguments can be pushed too far.
